Algebra Practice Worksheet

Practice

1. What is the y-intercept of the line described by the equation y = 3x + 9?

2. What is the y-intercept of the line described by the equation y = 2x + 13?

3. What is the y-intercept of the line described by the equation y = -3x - 11?

4. What is the y-intercept of the line described by the equation y = 5x + 16?

Solutions

1. (0, 9)

The y-intercept is the constant term b in y = mx + b, so the line crosses the y-axis at (0, 9).

2. (0, 13)

The y-intercept is the constant term b in y = mx + b, so the line crosses the y-axis at (0, 13).

3. (0, -11)

The y-intercept is the constant term b in y = mx + b, so the line crosses the y-axis at (0, -11).

4. (0, 16)

The y-intercept is the constant term b in y = mx + b, so the line crosses the y-axis at (0, 16).
