Algebra Practice Worksheet

Practice

1. What is the y-intercept of the line described by the equation y = -2x - 4?

2. What is the y-intercept of the line described by the equation y = 2x + 0?

3. What is the y-intercept of the line described by the equation y = -3x + 2?

4. What is the y-intercept of the line described by the equation y = 5x + 3?

Solutions

1. (0, -4)

The y-intercept is the constant term b in y = mx + b, so the line crosses the y-axis at (0, -4).

2. (0, 0)

The y-intercept is the constant term b in y = mx + b, so the line crosses the y-axis at (0, 0).

3. (0, 2)

The y-intercept is the constant term b in y = mx + b, so the line crosses the y-axis at (0, 2).

4. (0, 3)

The y-intercept is the constant term b in y = mx + b, so the line crosses the y-axis at (0, 3).
