Linear Equation Practice Worksheet

Practice

1. Solve for v: $264 - v = 101$.

2. Solve for v: $276 - v = 109$.

3. Solve for v: $246 - v = 80$.

4. Solve for v: $289 - v = 95$.

Solutions

1. $v = 163$

Subtract 264 from both sides to get $-v = -163$, then multiply by -1 .

2. $v = 167$

Subtract 276 from both sides to get $-v = -167$, then multiply by -1 .

3. $v = 166$

Subtract 246 from both sides to get $-v = -166$, then multiply by -1 .

4. $v = 194$

Subtract 289 from both sides to get $-v = -194$, then multiply by -1 .
